

Chia Network Inc.

KEYWORDS: GX (Green Transformation) / Web3 / Fintech

Challenges / Problems

- The global carbon credit market is fragmented, inefficient, complicated' and not transparent
- Existing solutions are not inclusive, secure, and/or decentralized

Proposed solutions

- A collaborative effort to address the Climate Crisis,
- Climate Warehouse: The foundational architecture to build market trust by enhancing transparency and securing the integrity of global carbon trading.
- Carbon Opportunities Fund: a global GX investment platform that will raise private capital for an innovative model to source, tokenize and sell high-quality, verified carbon credits.

Competitive advantages:

- Chia trusted by multi-laterals, governments, and top tier institutions
- We've designed our corporate structure with regulatory compliance in mind
- Fully Audited financials (independently audited annually by Armanino LLP, a PCAOB registered accounting firm)

Looking for collaboration / partnership with:

- Corporations focused on GX strategy
- Financial Institutions interested in Green Finance
- Web3 and Metaverse Companies

Future Business Plan:

- Become 10% of the global carbon market infrastructure
- Plan to become a public reporting company subject to the Securities Act of 1933 on NASDAQ or NYSE
- Web3 and Metaverse strategy
